

Fortune-Cord Visual System Manual V1.0 (20260805)

“FORTUNE CORD · COIN CORD” Visual System

Using “a cord threading a coin” as the core language to reinterpret:

Taiji · Bagua · Hetu Luoshu · Lunar Mansions · Asterisms · Constellations · Zodiac · Other Astral Patterns

Coin Shapes:

[Square-Hole Round Coin](#) · [Heart Star Coin](#) · [Global Star Coin](#) · [Sycee Ingot](#)

Floral Star Coin · Fruit Star Coin · Furry Star Coin · Gemstone Star Coin

○ + □ + — = FORTUNE CORD

○ = coin shape; □ = coin hole; — = connecting line

The circle represents the coin shape, the square represents the coin hole, and the horizontal line represents the connecting line – the result is the FORTUNE CORD.

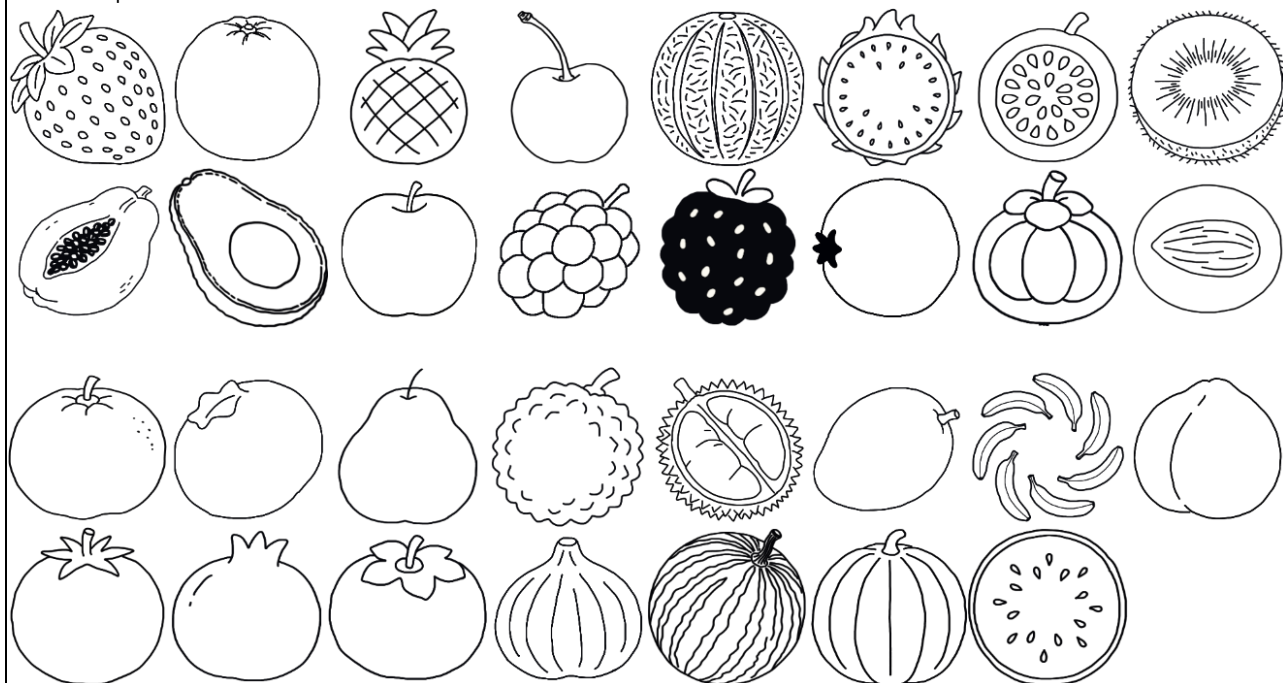

In this system, the coin shape (○) includes circles and their transformed biological, natural, and geometric variants.

Any opening or marking in a design that allows a cord to pass through is regarded as a coin hole (□) of this system.

Type	Pattern
Coin shape	Global star coins

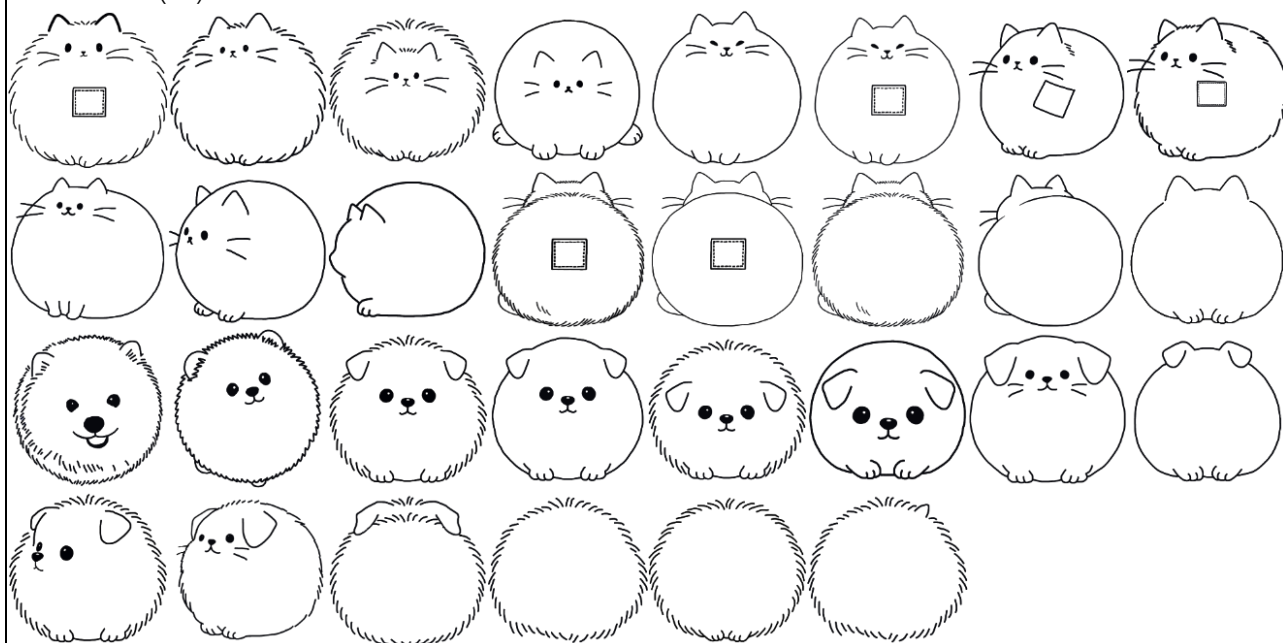

Fruit star coins:

strawberry coin, orange coin, pineapple coin, cherry coin, hami melon coin, dragon fruit coin, passion fruit coin, kiwi coin, papaya coin, avocado coin, apple coin, grape coin, mulberry coin, hawthorn coin, mangosteen coin, almond coin, mandarin orange coin, blueberry coin, pear coin, lychee coin, durian coin, mango coin, banana coin, peach coin, cherry tomato coin, pomegranate coin, persimmon coin, fig coin, watermelon coin, cantaloupe coin.

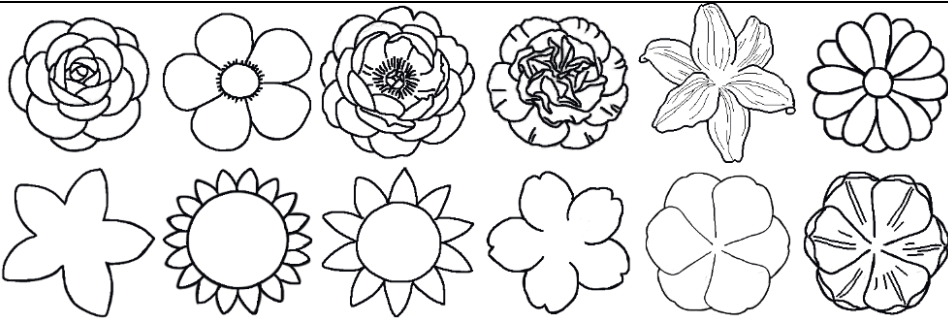

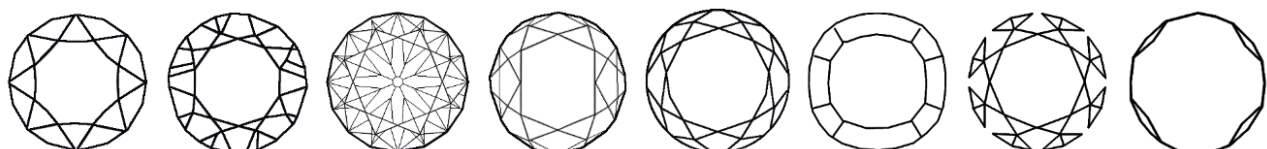

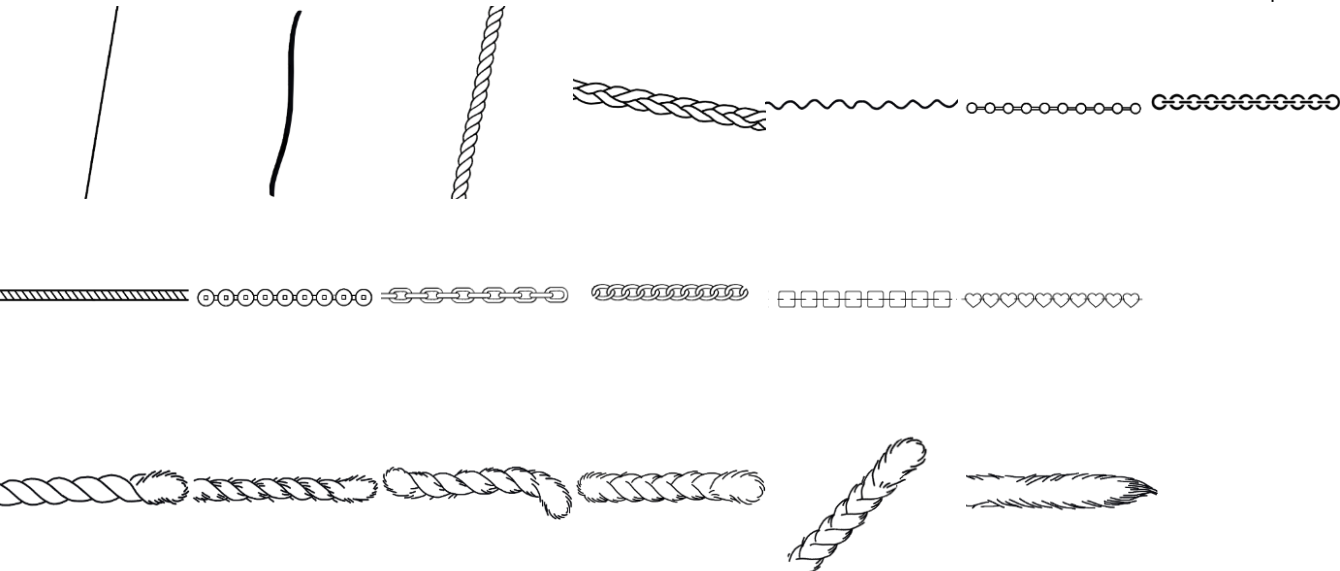

Furry star coins

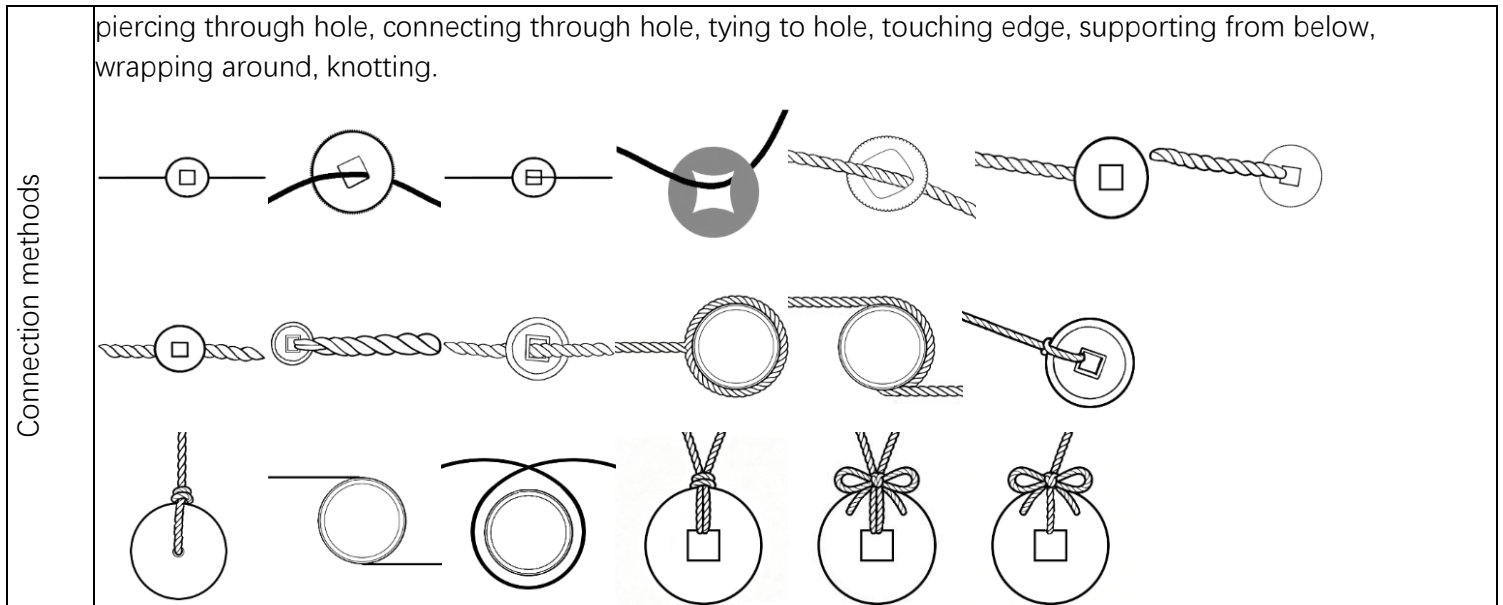

cat coin, dog coin, earless beast coin, single-eared beast coin, two-eared beast coin; square mark on the belly = coin hole (□).

Floral star coins

rose coin, carnation coin, lily coin, daisy coin, plum blossom coin, peony coin, golden jasmine coin, sunflower coin, wildflower coin, cherry blossom coin, tulip coin.

	 Gemstone star coin 
Coin hole	square hole, four-notched hole, four-radiating hole, round hole, decorative perforation, square pocket, square mark. 
Connection lines	composed of straight lines, curves, cord forms, chain forms, coiled tails, and furry tails, used for Taiji, Bagua, Hetu Luoshu, Lunar Mansions, Asterisms, Zodiac, Orion, Ursa Minor, Southern Cross, and other astral patterns. 

Style and Originality Description:

This visual system establishes an astral translation expression system based on the dynamic arrangement of nodes (such as various coin forms and round symbols) and paths (such as cords, stitched lines, and solid lines). Its core feature lies in the topological interaction between nodes and paths:

1. **Proportional Compatibility:** Includes artistic reproductions of natural astral proportions as well as proportion distortions based on aesthetic reconstruction (e.g., center-of-gravity shifts and proportional adjustments). The proportional adjustments of star charts in this system are made intentionally for aesthetic narrative purposes, not as a scientific reproduction of astronomical data.
2. **Element Substitutability:** Allows nodes to be dynamically arranged in different forms (such as square-hole coins, biological round coins, and natural round coins) and freely combined with various cord/line forms (such as twisted cords, stitched lines, and geometric lines). Under this logic, any opening, specific marking, or visual center in a design that carries a connecting line is regarded as a “coin hole (□)” as defined by this system.
3. **Originality Statement:** The visual combination method of “round coin nodes + cord/line connections + astral reinterpretation” presented in this manual is the original artistic expression of the copyright holder.

Scope of Protection:

The protected subject matter of this system includes but is not limited to:

1. **Core Elements:** Original artistic variants of star charts created through the dynamic arrangement of nodes (various coin forms, biological/geometric variants) and paths (cords, stitched lines, solid lines).
2. **Composition Logic:** The overall visual language and topological arrangement system that reconstructs astronomical star charts through “cords threading through modified coins.”
3. **Derivative Expressions:** Node combinations, proportional variants generated from the logic of this system, and substantially similar expressions based on the above visual logic presented on any physical or digital medium, including applied navigational systems (e.g., road markings, ceiling light patterns, architectural guiding motifs).

Not for use in:

Extremist religious, political, gambling, pornographic, illegal activities, or any use that may harm the reputation of this cultural IP.

Copyright Policy:

- Non-commercial derivative works: Free and open, with attribution required. Secondary creations must still comply with this copyright policy.
- Commercial use: Requires authorization (single-image license, series license, or custom development).
